LORIOT

IoT Consultancy Services

Premise

LORIOT's IoT and technology professionals are industry leaders in guiding organizations through the end-to-end steps of enterprise IoT transformation and LoRaWAN® network deployment.

Ensure the highest return on investment (ROI) on your LoRaWAN® network by investing in an experienced led strategy, design, implementation, and optimization of the systems that empower your people to new levels of performance.

Facts & Figures

Founded in Switzerland in 2015

150+ Countries

20'000+ Registered Users

17 Distributed Public Servers

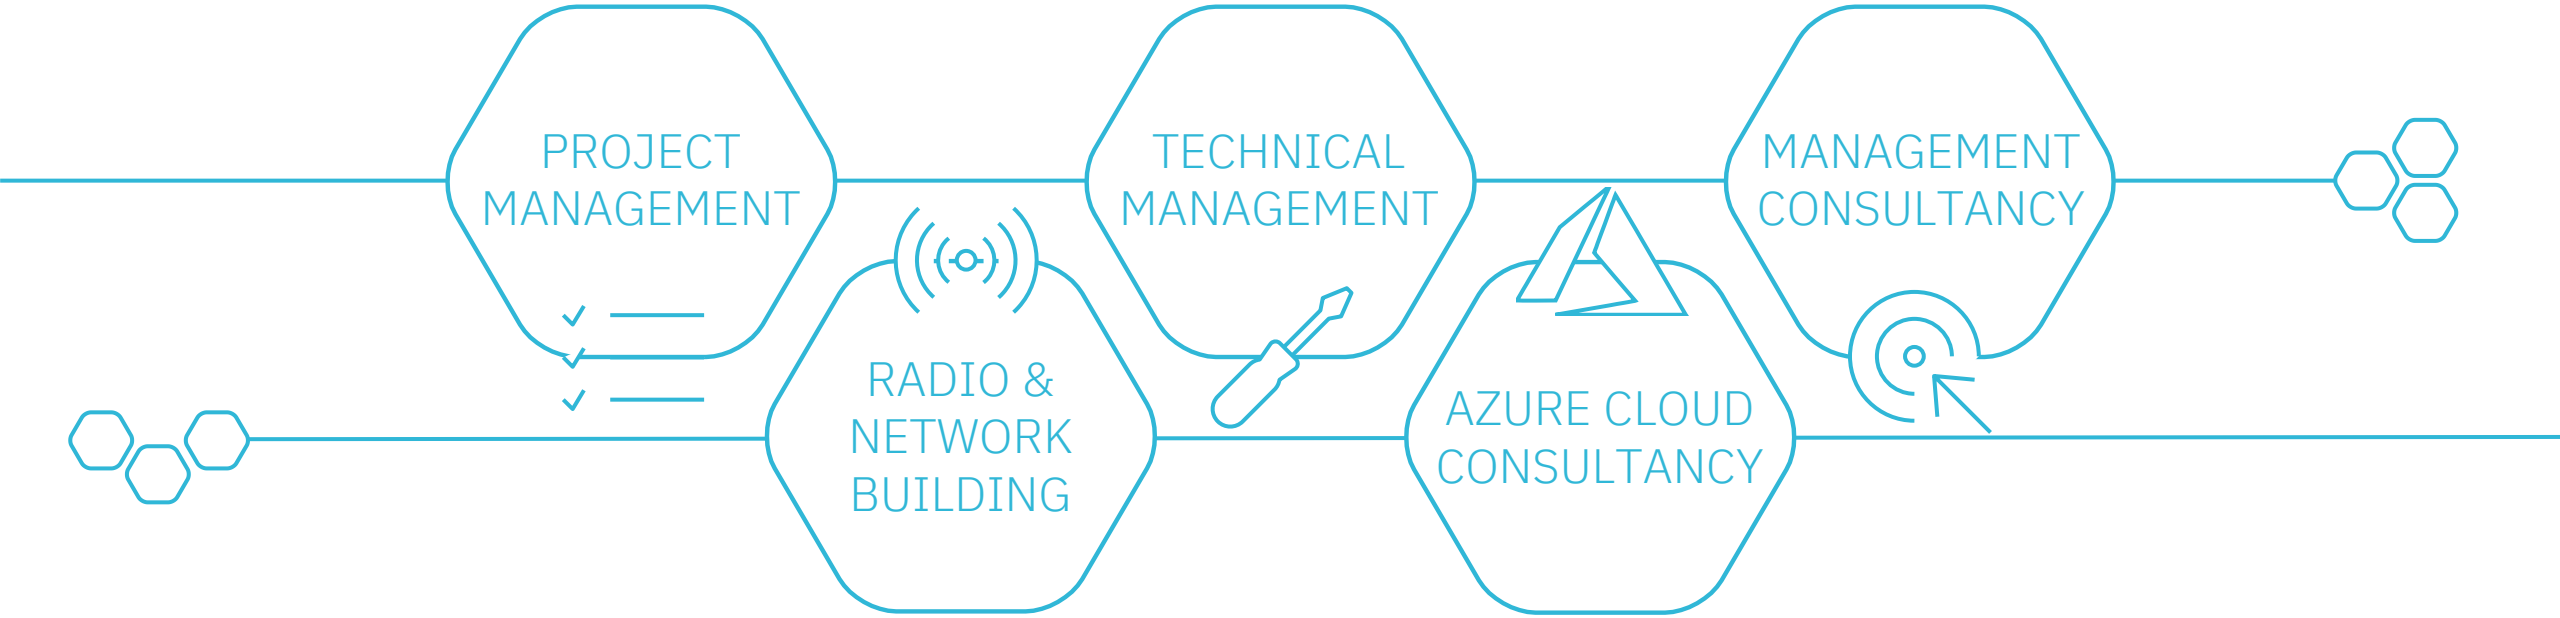
Worldwide on-premise Deployments

11 Nation-wide Deployments

35+ Smart Cities supported

Areas of Expertise

IoT requires expertise across a wide range of information technology fields and you can leverage our knowledge with consultancy services in the following areas:



LORIOT
WITHOUT STRATEGY
EXECUTION IS AIMLESS.
WITHOUT EXECUTION
STRATEGY IS USELESS.
Morris Chang

Project Management

Project Management expertise in LoRaWAN network deployment. Can provide guidelines in deployment methodology and best practices. Suitable for clients managing their first PoC, production service or scaling up phase.

- Planning the Server and Network Architecture
- Identifying the right Hardware for the Use-Case
- Contrasting Expectations and Technological Limitations
- Managing Deployment Timelines

Radio & Network Building

LoRa Radio expertise, providing a methodology for radio planning phases. Can provide guidelines on device and gateway deployment/installation and radio mapping. Recommend for clients deploying network infrastructure to maximize potential.

- LoRaWAN® best practices
- Radio coverage mapping
- Device & Gateway Deployment
- Network Optimization

Technical Management

LORIOT and LoRaWAN® technical expertise. Can provide dedicated support for specific activities such as support of the commercial launch, configuration recommendations, support in hardware provisioning, API integration, and functional testing. Recommended for all clients for a fast track to network server familiarisation and integration.

- LoRaWAN® specification deep dive
- Device & Gateway provisioning and management
- Network operations and maintenance
- Network infrastructure and integration

Azure Cloud Consultancy

Our Azure Cloud experts will help you to seamlessly integrate your LoRaWAN data into your cloud infrastructure. With their extensive know-how of the Azure cloud services our consultants will support you in developing a scalable and future proof architecture for your IoT use cases.

- Ingestion of LoRaWAN data into the Azure cloud infrastructure
- Integration of the LORIOT Network server into your Azure cloud infrastructure
- Support in building an azure cloud architecture around your IoT use case
- Support in setting up data processing pipeline to compute, store and visualize your IoT data

Management Consultancy

Execute business & advisory consulting tasks for business/use-case development, ecosystem planning and product positioning. Suitable for clients who are looking to increase adoption of their service.

- Business development and commercialization
- Product adoption and scaling strategy
- Product positioning and implementation
- Ecosystem growth and partner models

Pricing

Consultancy sessions are held via video conference or in-person where possible, and to take advantage of this service, please get in touch for more details about our services and our hourly rates.
